

NORANDEX
MAXIMATM
FIBERGLASS ENTRY DOORS

THE BEAUTY OF ARTISAN CRAFTSMANSHIP IN RESILIENT FIBERGLASS

Shown: Full Lite Smooth Door, Full Lite Sidelites and Transom in Valli Red, all with Windsor Glass. Addison handleset in Black. Transom not part of QuickShip offering.

Cover Photo: Full Lite Oak Grain Door and Full Lite Sidelites with Wyngate Glass, both in Black. Addison handleset in Black.

MAXIMA™ ENTRY DOORS – ANOTHER WAY NORANDEX MAKES COMING HOME BEAUTIFUL.

▶ BEAUTY

You never get a second chance to make a great first impression. That's why MAXIMA™ Entry Doors are thoughtfully designed with enhanced details to greet you and your guests with classic elegance and style.

▶ DURABILITY

For more than 65 years, Norandex has led the way in delivering the highest quality building materials, and MAXIMA™ Entry Doors are no exception. Manufactured by one of Window and Door magazine's TOP 100 manufacturers* and available exclusively through Norandex, each MAXIMA™ entry system features top quality construction, made with the finest materials.

▶ SECURITY

Your security and safety is one of our main concerns. That's why MAXIMA™ Entry Doors utilize only the most respected names in hardware like Schlage™ handlesets and locking mechanisms.

▶ ENERGY EFFICIENCY

Today, energy efficiency is more important than ever. And it is why MAXIMA™ Entry Doors are ENERGY STAR* qualified. Choosing ENERGY STAR products for your home helps save on heating and cooling costs year round, as well as providing you with a more comfortable living space and added appraisal value to your home.

▶ DECORATIVE GLASS

Exceptional quality decorative glass doorlites, sidelites and transoms take style and sophistication to a new level.

- Artistically designed patterns
- Assembled by skilled craftsmen
- Precise cutting, mitering and soldering
- Made with hand-made glass panels

Decorative glass achieves visual character through aesthetic imperfections that mimic hand-made sheet glass of centuries past – each exhibiting textural waves and striations, random seeds (air bubbles) and a variety of other natural effects.

*Not all glass patterns. Ask your MAXIMA™ representative for more information.

For more than 65 years, America's professional builders and remodelers have counted on Norandex for their exterior building supplies. From siding, windows, doors and roofing to decking, railing and columns, Norandex supplies an array of products from the industry's most recognized manufacturers – brands that homeowners seek and contractors trust. Norandex stocks, sells and services a great selection of products designed to exceed homeowner's expectations around low maintenance, energy efficiency, superior performance and a pleasing appearance.

Our highly motivated and trained employees have a deep knowledge of the products we provide and a passion for helping our customers succeed. As a result, our customers – and their customers – can be confident in the products they purchase and trust the advice and recommendations made by our employees. With support from our parent company, Saint-Gobain, the world leader in construction materials distribution, Norandex invests in the training and development of our people, products and services. This unwavering commitment to being the best and providing the best is what sets us apart from the competition.

When you choose Norandex, you're getting a partner that knows the market, inventories the products you need and delivers timely service. Norandex...Bringing Your Dreams Home!

Shown: Full Lite Oak Grain Door with Wyngate Glass, in Black. Addison handleset in Black.

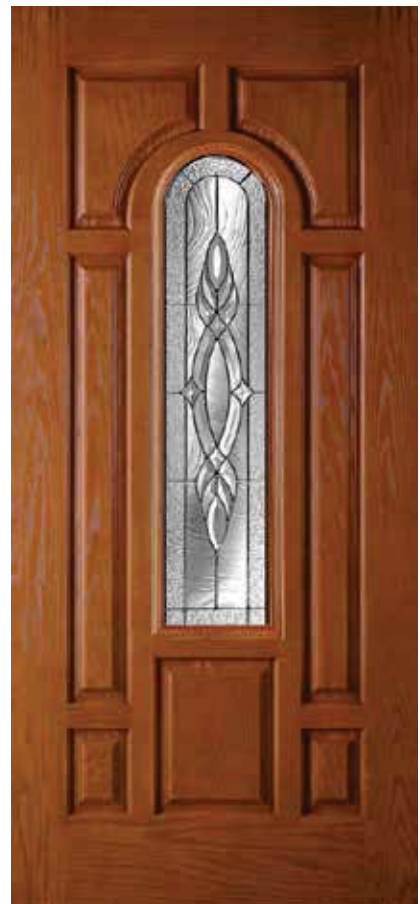

THERE ARE A MILLION GREAT REASONS TO CHOOSE
MAXIMA™ ENTRY DOORS.
BUT, REASON ONE MILLION AND ONE IS THE MOST IMPORTANT OF ALL.

▶ A DOOR TO HOPE.

Through an exclusive manufacturing relationship, Norandex is proud to support Tough Enough to Wear Pink™, a national non-profit organization diligently working toward fundraising for breast cancer research. Which means every MAXIMA™ door we deliver helps bring us one step closer to a cure. Ask for complete details.

**TOUGH ENOUGH
TO WEAR
PINK?**

Shown: Full Lite Smooth Door with Crosslines Glass in White. Plymouth handleset in Satin Nickel.

▶ COMPOSITE FRAME SYSTEM

Composite door frames are an innovative new alternative to traditional finger-jointed wood door frames. Research proves full-length composite door frames combine all the strength and convenience of wood door frames with enhanced properties that make them moisture- and insect-resistant. The composite, rot-free polyfiber door frame will last years after wooden frames have deteriorated. Composite polyfiber frames will never absorb moisture, splinter or rot like wood door frames, or rust like metal door frames. And on MAXIMA™ Fiberglass Entry Doors from Norandex, they are a standard feature.

- Low maintenance
- Resistance to wear, splitting and impact
- Excellent nail and screw holding strength
- Great paint, stain and glue adhesion
- Can be installed below grade or to masonry
- Does not promote mold or mildew
- Moisture and termite proof material
- Lifetime warranty for rot, decay and insects

WOOD FRAME

COMPOSITE FRAME

THE ONLY THING MORE BEAUTIFUL THAN THE OUTSIDE IS THE INSIDE.

▶ PATENTED HYDROSHIELD TECHNOLOGY™

Exclusive HydroShield Technology™ features fiberglass reinforced door skins, full-length composite stiles and composite top and bottom rails to prevent water infiltration on all six sides.

▶ COMPOSITE TOP AND BOTTOM RAILS

Additional non-porous protection keeps water from seeping into the door and helps prevent mold and mildew.

▶ FIBERGLASS REINFORCED SKIN

Fiberglass is unmarred by the wear and tear of everyday use and is unaffected by moisture and humidity. The doors will not rot, splinter or warp like wood, and won't dent or delaminate like steel.

▶ FULL-LENGTH COMPOSITE STILES

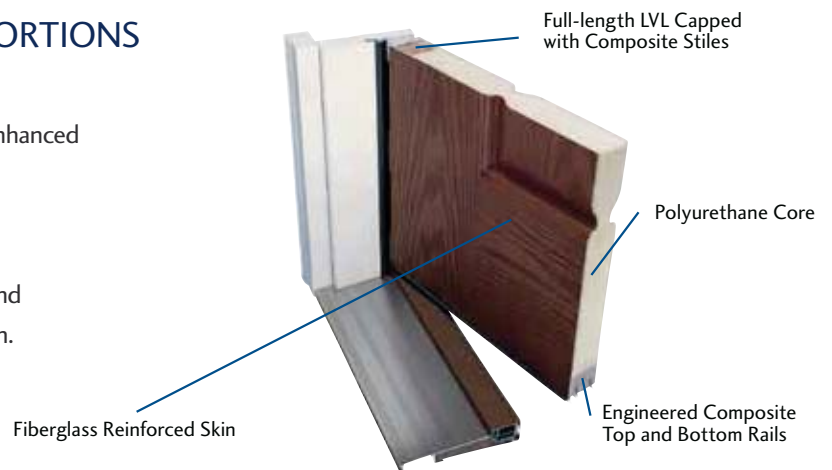

Entry doors feature full composite stiles to prevent water infiltration into the door's insulation and full-length LVL to ensure the door will never warp, rot or rust.

▶ ARCHITECTURALLY CORRECT PROPORTIONS

Beautifully detailed panels replicate traditional wood door construction to create crisper shadow lines and enhanced curb appeal.

▶ INSULATED CORE

Environmentally friendly insulation is 100% CFC-free and provides a high R-value for maximum thermal protection.

FEATURES & COMPONENTS

FIBERGLASS Entry Doors

▶ ADVANCED SILL DESIGN

The sill's innovative design prevents rotting, warping and deterioration over time. The thermally broken sill includes a composite substrate and synthetic cap and nosing. Incorporating a high dam overlap cap in the 1-3/8" sill height creates a tough barrier against water penetration. Door sills are available in mill finish, satin nickel and bronze. ADA-compliant sills are also available.

▶ DOOR BOTTOM SWEEP

The double bulb sweep maintains maximum surface contact with the threshold rail, consistently outperforming competitive products by encapsulating both the outside and inside edges of the rail.

▶ WEATHERTIGHT SEAL

Energy-efficient Q-Lon weatherstripping provides a weathertight seal along the sides and top of the door frame and interlocks with the Simple Solution Corner Pad to ensure the most energy-efficient seal available for keeping moisture, air and dirt out of your home.

▶ BALL BEARING HINGES

Ball bearing hinges are standard – featuring four-point attachments to the door and the door frame for a lifetime of dependability.

▶ ROT-FREE BRICKMOULD

Provides a beautiful transition from the frame of the entry door to the exterior of the home. Constructed of a durable composite material, this brickmould design resists rot, decay and damage from insects. Customizable up to 4" wide.

▶ SECURITY STRIKE PLATE

Where applicable, a steel security strike plate adds extra strength to help prevent forced entry.

▶ DUST BOX

The dust box, located beneath the deadbolt strike plate, provides a barrier to air infiltration and also conceals the deadbolt latch.

Shown: 2 Panel Oval Deluxe Door in Enzian Blue with Princess Glass. Plymouth Handleset in Satin Nickel.

COLORS & FINISHES

FIBERGLASS Entry Doors

DOOR TEXTURES

Fiberglass doors are available in three finish textures. Not all door styles or sizes are available in all textures.

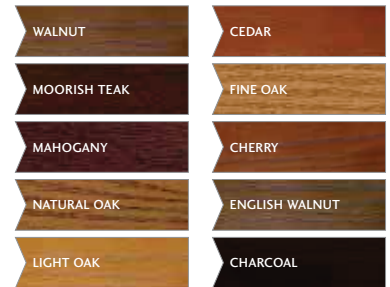

SMOOTH

OAK GRAIN

MAHOGANY

10 STAIN FINISHES

- 10-year finish warranty
- Will not fade, flake or peel
- Same stain color interior and exterior or
- Different stain color interior and exterior or
- Stain one side paint other side

21 DESIGNER PAINT COLORS

- State-of-the-art HVLP paint application
- 7-year finish warranty – smooth
- 10-year finish warranty – textured
- Clear, two-part auto-grade topcoat
- For smooth and woodgrain entry doors
- Same paint color interior and exterior or
- Different paint color interior and exterior or
- Paint one side stain other side

PREFINISHED CASING

Standard clear Poplar 2-1/2" Ranch or Colonial style casing covers paint lines for a finished appearance. Casing is also available in Oak and 3-1/2" wide.

Indicates screen color choices.

Paint and stain colors shown are representative. Every precaution has been taken to ensure colors are accurate, but due to the printing process, variances do occur. Please consult your MAXIMA™ representative prior to ordering.

VENTING SIDELITES

FOR FIBERGLASS ENTRY DOORS

Form follows function in one beautiful package — a continuous sill with one or two hinged sidelites. Full, wide mullions add strength and stability where sidelites are opened. Full length composite capped LVL sidelite stiles provide additional strength where multi-point lock and hinges are anchored. Full screens with fiberglass mesh are easy to remove and are available in complementary colors. Inswing configurations only. Venting Sidelites are available with blinds, internal and external grids as well as decorative glass.

- Inswing Only
- 12" and 14"
- 6/8 Heights
- 3" Maximum Height Reduction
- Full Screen – Sidelite Only
- Multi-Point Hardware Standard
(*Operating Sidelite only*)

Shown: Full Lite Smooth Door with Full Sidelite in white. Flair handleset in Satin Nickel.

*12" Sidelites are not available with Craftsman style frame, or as any 3/4 lite sidelite.

When a single door is too small and a double door is too big, choose an Operating Sidelite. Operating Sidelites function just like a traditional double door through the use of an easy-to-use, thermally-broken astragal that allows the sidelite to swing open. A hinged door and hinged sidelite become a single unit with a continuous sill. All styles of sidelites (Full Lite, 3/4 Lite and 1/2 Lite) can become operational. Operating Sidelites are also available with blinds, internal and external grids as well as decorative glass.

OPERATING SIDELITES

FOR FIBERGLASS ENTRY DOORS

Shown: Oak Grain 2 Panel 3/4 Lite Door with 3/4 Sidelite in Cranberry. Wyngate wrought iron glass and Camelot handerset in Aged Bronze add to the rustic charm.

PATIO DOORS

2 PANEL & 3 PANEL FIBERGLASS ENTRY DOORS

Patio Doors are available in a two panel or three panel door configuration. On two panel patio doors, one panel is operational (inswing only) while the other remains fixed. On three panel patio doors, two panels remain fixed while the remaining panel is fully operational (inswing only). A heavy duty top-hung aluminum screen frame (available in seven popular colors) with fiberglass mesh allows for virtually effortless operation. Patio doors are available with any of the decorative glass patterns that fit Full Lite door styles shown on the following pages.

Shown: Three panel white, smooth finish patio door created from Full Lite Doors with Classic Glass. Camelot handleset in Satin Nickel.

MAXIMA Entry Door systems are available as French Double Doors. When ordered in this style, Entry Doors feature a color-matched astragal pre-assembled into the door frame. When locked using the durable steel lock pins at the head and sill of the unit, the astragal keeps one panel of the entry system locked in place, while allowing the other door panel to open and close. With the astragal unlocked, both door panels open and close freely.

EASY OPERATION

On French Double Door Systems, Astragals are locked and unlocked with fingertip adjustments.
